

WHAT IS IT ?

Pilfood® Complex is a new dietary supplement scientifically developed to provide an adequate and necessary amount of essential elements for the growth of healthy hair and nails.

Pilfood® Complex is suitable for both men and women with weak, damaged and brittle hair and nails.

Pilfood® Complex works from the inside direct to the root, the living part of hair.

Pilfood® Complex contains all of those vitamins, minerals and essential amino acids, that the body uses to produce Keratin, the 90% of hair composition.

HISTORY

The original Swiss formula for Pilfood® was developed in the 60s by Robert Golaz in Lausanne as a general solution for hair loss in his family and evolved from then into different presentations and formulations worldwide with Pilfood® Complex as the latest improved formula.

HAIR LOSS EFFECTIVENESS

Dermatological studies have shown that treatment with **Pilfood® Complex** administered over a period of 3-6 months leads to statistically significant improvements in diffuse and androgenetic alopecia.

The trichogram shows that anagen phase is increased by 16.97% while the telogen phase is reduced by 34.52%.

- 81% of the volunteers have less hair loss in the combing and washing hair test.
- 74% of volunteers noticed the hair stronger and more vital.
- 67% of volunteers noticed stronger nails.
